

# Hardware and Interoperability

In this section you will find information about configuring the most popular phones - both hardware and software - gateways and other devices, like firewalls for instance. Here you will also find informations about interoperable devices and services.

Make sure you see the [eZuce Vendor Certification Program](#) page to understand phone compatibility statements.

An entire section is dedicated to connecting to PSTN.

ITSP that are known to work

[Interoperable SIP Trunk Providers](#)
