

Dial Plan

- [View or modify dialing rules](#)

View or modify dialing rules

Available in 14 starting with 14.10

Resource URI: /rules/{ruleId}

Default Resource Properties:

The resource is represented by the following properties when the GET request is performed:

| Property | Description |
|----------------------------|---|
| id | |
| name | |
| enabeled | |
| type | Each dial plan type can be created using proper type field: International Emergency Mapping_Rule Custom Local Internal Long_Distance Restricted Toll_free Attendant Intercom Paging Site_to_Site Authorization_Code |
| description | |
| permissions | |
| hatewayAware | |
| authorizationChecked | |
| internal | |
| pstnPrefixOptional | |
| longDistancePrefixOptional | |
| externalLen | |
| optionalPrefix | |
| emergencyNumber | |
| afterHoursAttendantEnabled | |
| enableLiveAttendant | |

Specific Response Codes: N/A

HTTP Method: GET

View the description for the specified schedule ID.

Example: XML format

```
<Rules>
```

```
<Rule>
```

```
<id>1</id>
```

```
<name>Emergency</name>
<enabled>>false</enabled>
<type>Emergency</type>
<description>Emergency dialing plan</description>
<permissions />
