

Caller Id Rewrite

Configuration:

- yum install sipxcustomcallerid
- service sipxconfig restart
- in Features > Custom Caller ID, Settings tab enable custom caller id

Enable Custom Caller Id	(Default: unchecked)
-------------------------	----------------------

- In DNIS tab upload csv file with wanted rules

CSV file should have following format:

```
from,to  
200,TEST1  
201,TEST2  
202,TEST3
```

"from" column contains extension to be rewritten and "to" column the value to rewrite caller id with
When placing calls from one of defined extension the callee will see the defined value instead caller's id
